PROJECT DESCRIPTION

NEWFI (2021-PresentDate):

Newfi Whole sale was founded with a vision of setting a new standard for efficiency, simplicity and transparency in the wholesale lending market. Newfi passion is combining our proprietary web technology with personal touch to reshape the way our mortgage partners shop for and close a loan. Newfi allows us to offer a superior experience at a lower cost. That translates in to better service and great rates for our customers.

Mortgage lending is changing, and Newfi Lending is leading the way by automating communication, document collection, shopping and more.

Newfi lending portal gives customers a simple way to close their loan and connect to all stakeholders throughout the lending process.

EDICINE (2020-2021):

Edicine is an adaptive, online self-learning platform that helps children improves their understanding of core skills. It allows each child to follow a unique learning path based on his or her needs. Class 1-10 Maths's. A key feature of the software is its ability to use these data to finely benchmark the learning level of every student and dynamically customize the material being delivered to match the level and rate of progress made by each individual student.. Errors and precisely target content to alleviate conceptual 'bottle necks' that may be difficult for teachers to diagnose or address at the individual student level in a classroom setting. Edicine can be delivered in a variety of settings (in schools, in after-school centers, or through self-guided study); it is platform-agnostic (can be deployed through computers, tablets, or smart phones); and it can be used both online and offline.

EDUCATION

2016-19   **Master of Computer Application**

Biju Patnaik University of Technology, Rourkela, Odisha.

AWARDS & ACHIVEMENTS

"Certificate of Excellence Award" for outstanding performance during the year2022-23.
